

## **MSF Camry**

Consigned by Crooked Pines Farm

ILR #298513

DOB 5/16/23

Female

MSF Camry is flashy and heads up. Her sire, GNLC Crocket, needs no introduction or attention drawn to his accolades. Her dam, Wheatfield's Miata, has produced many beautiful llamas as well. Camry has shown a few times for me and has done fairly well. She is sweet and easy to manage. Camry has a lot of volume to her fiber up front, but the TN heat caused her to lose some of her rear leg fiber. Her fiber is fine and kinky. She will be a powerful producer for someone wanting to add in the famous Crocket lines. Camry hasn't had as much work on our obstacles, but many of her siblings have done exceedingly well in performance. She is only being offered to represent my farm well. She may be one that I deeply regret selling.
