

MSF ARIZONA

How often do you get the opportunity to buy a female of this quality whose sire and dam are both National Champions? Arizona makes Turquoise's 6th cria to date. If you look up her production on the ILR website it includes her only son, MSF Apache, that has been winning at the shows this spring. The females she has produced include National Champions for respected owners and breeders from around the U.S.

Arizona will be just 13 months old come sale day and is very big for her young age. Arizona will be a very competitive show girl until she is retired to your breeding pasture. To sweeten this offer, we are making available free transportation to the Glacier Classic in July.
