

PVL ASTRA CELESTIA PRIDE

PVL Astra Celestia Pride is a standout juvenile female sired by Hard Rock's Pure Pride and out of Squires Show Stocks Shimmer & Shine showcasing a pedigree stacked with proven, consistent genetics. She carries the style, balance, and presence you expect from this cross, with correct conformation, a refined head, and exceptional fiber character already developing.

Her fleece shows impressive brightness, density, and uniformity for her age, and she represents the kind of female that elevates both a show string and a breeding program. Quality at this level, with this lineage, is rarely available.

Serious breeders looking to add a future foundation female with elite potential should take a close look at PVL Astra Celestia Pride.
